

Introduction and Overview
Eastman Chemical Company AIA Continuing Education Program

Eastman Chemical Company is an active participant in the Continuing Education System provided through the AIA. The title of our course is *Protective Window Films for Multiple Hazards*. This course number is

0CPF02 providing 1 LU in HSW. The presentation is a Power Point Program with interactive questions encouraged.

The topics covered in the presentation are tests performed on filmed glass which demonstrate practical solutions which impact the following hazards:

- Human Impact
- Windborne Debris
- Blast Hazard
- Seismic
- Graffiti
- Forced Entry
- Spontaneous Glass Failure
- Electronic Asset Theft and Disruption

As a result of this presentation the architect will gain a general knowledge of:

1. Various testing methods for Protective Window Films.
2. Specifying Window Films for Safety and Security Requirements.
3. When to specify an edge retention system.
4. How protective window films can reduce personal injury and property damage.
5. Use of window films to protect electronic assets.

The contents of the presentation are generic and abide strictly to the rules provided through the AIA Continuing Education System. A sign-up sheet is provided during the presentation and Eastman Chemical Company will submit all information to the AIA in a timely fashion.

Please contact Lewis Pitzer at 614-989-3440 or lpitzer@performance-companies.com to schedule a presentation.
